Economic Commentary

Uncertainty regarding U.S. and China trade negotiations and expectations for a Federal Reserve rate cut at the end of the month were the major forces that drove markets. Early in the month, President Trump and President Xi of China agreed to a truce as the latest survey of businesses suggested growth momentum continued to slide. The weakness in global manufacturing continued unabated and the subdued inflation and softening inflation expectations prompted expectations of “insurance cuts” from the Fed. At its July 31 meeting, the Fed eased for the first time since December 2008 on the back of slowing business investment, a weak US manufacturing sector and downside risks related to depressed global growth and muted inflation. This was in contrast to still robust conditions in the labor market and strong consumption spending in the US. The 3-month Treasury bill yield declined 3 basis points (bps) to end the month at 2.06%. Then, on August 1st, the US-China trade war was escalated as President Trump lamented the outcome of a round of negotiations between top US and Chinese officials. In a series of tweets that sent the markets reeling, he said the US would place a 10% tariff on \$300bn of additional Chinese goods starting September 1st.

The domestic drivers of U.S. growth continue to remain intact and consumption will continue to be the bedrock of growth in the second half of 2019. The main factors driving the consumer include rising incomes, an elevated savings rates and strong employment growth and rising participation for price age workers. With the labor market still tight and layoffs still low, we would expect gradual wage growth to continue and job growth to slow as the year progresses. The trend pace of core CPI should remain supported around 2.0 – 2.25% as long as the labor market continues maintain its strength. At this point in time, the impacts of the trade war are expected to slow growth closer to trend, depress business investment and slow the manufacturing activity but have not yet meaningfully impacted labor markets or the service sector which has remained resilient. We expect the Fed to cut policy rates two additional times in 2019 in order to address the downside risks to US growth, rising trade tensions and a slowing U.S. manufacturing sector with risks to business investment. The case for the Fed to continue to ease policy further is also bolstered by low inflation that is below the Fed's 2% target.
