Exhibit A – CTRMA Independent Estimate

Exhibit B – Directive Letter 08 ("DL-08")

Exhibit C – CTMC Response to DL-08

Exhibit D – Revised Plans

This change order is the result of a CTRMA-Directed Change to provide a safer ingress/egress point for the Manor New Tech High School. Ramp TR-20, the eastbound ramp that transitions eastbound traffic from the tolled facility to the existing US 290E facility, was revised to prevent exiting school traffic from crossing the eastbound lanes to enter the westbound lanes. To further prevent this movement, the existing crossover was removed. Both of the Manor New Tech High School driveways were reconstructed, and the eastbound frontage road was revised to provide a "forced" right-in and right-out condition. Additionally, the far eastern terminus of the project was revised to transition to an impending TxDOT project in Manor.

Atkins, the General Engineering Consultant for the Manor Expressway Project, performed an independent estimate for the purpose of negotiating this change order. Atkins performed a "level of effort" estimate for the work associated with this change; quantities were independently verified. Contractual mark-ups were applied to this independent estimate. This independent estimate is included in this Exhibit A. Atkins' independent estimate results in a cost increase to the Project in the amount of \$1,416,959.06. After negotiations with CTMC, this change results in an actual additional cost to the Project in the amount of \$1,180,548.78.
