Average Weighted Average Maturity (2)*	115 Days

Definition of Weighted Average Maturity (1) & (2)

- (1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.
- This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.
- The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waived in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

New Participants

We would like to welcome the following entity who joined the TexSTAR program in September:

Holiday Reminder

In observance of Columbus Day, TexSTAR will be closed on Monday, October 10, 2016. All ACH transactions initiated on Friday, October 7th, will settle on Tuesday October 11th. Please plan accordingly for your liquidity needs.

In observance of the Veterans Day holiday, TexSTAR will be closed Friday, November 11, 2016. All ACH transactions initiated on Thursday, November 10th will settle on Monday, November 14th.

Economic Commentary

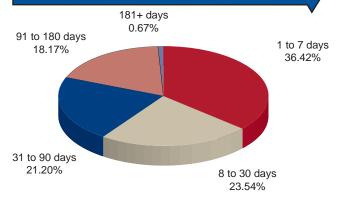

Market participants entered the quarter with many uncertainties but global markets rebounded as the UK Brexit referendum showed little evidence of contagion throughout the European Union, US payroll numbers bounced back averaging over 200,000 per month for the third quarter, and central banks continued to be accommodative. Growth in much of the world is stabilizing, but at below historical levels. Businesses are investing like they're in a recession: the bulk of investment has not been in physical assets, but into the deadweight costs of security and control functions. These don't drive productivity and growth (one could argue that they actually sap growth), although they may have contributed to an environment of lower volatility. Globally, disinflationary forces are in control and a sub-trend recovery remains the base case. As central bank policy loses its effectiveness, what's needed is fiscal spending. It is hard to see fiscal spending happening in a meaningful way over the coming quarters, particularly in the U.S., where the presidential election makes compromise in Washington unlikely. It's possible that we won't see meaningful fiscal policies implemented until the next recession. With global growth stabilizing at sub-trend levels and without any meaningful signs of inflation, the Fed is expected to remain extremely slow and cautious. Its members don't want to create an imbalance that would destroy the modest growth that exists. It was anticipated the Fed would to lower its future expectations, as it did on September 21 with one rate hike in December still expected. The ongoing failure by central banks to reflate the global economy and raise inflation expectations is frustrating to them as well as to most investors. As they begin to publicly second-guess the unconventional tools they have deployed, investors are left wondering what will happen to the economy and especially, to asset prices. In the absence of meaningful fiscal stimulus, ideally in combination with structural reform, the post-crisis deleveraging will have years to run and ultimately, have to be underwritten by the central banks reminding us that these unconventional tools have one unambiguous benefit: they make the debt burden sustainable.

TexSTAR versus 90-Day Treasury Bill

■ 90 Day T-BILL Rate ■ TexSTAR Rate

This material is for information purposes only. This information does not represent an offer to buy or sell a security. The above rate information is obtained from sources that are believed to be reliable; however, its accuracy or completeness may be subject to change. The TexSTAR management fee may be waived in full or in part at the discretion of the TexSTAR co-administrators and the TexSTAR rate for the period shown reflects waiver of fees. This table represents historical investment performance/return to the customer, net of fees, and is not an indication of future performance. An investment in the security is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the issuer seeks to preserve the value of an investment at \$1.00 per share, it is possible to lose money by investing in the security. Information about these and other program details are in the fund's Information Statement which should be read carefully before investing. The yield on the 90-Day Treasury Bill ("T-Bill Yield") is shown for comparative purposes only. When comparing the investment returns of the TexSTAR pool to the T-Bill Yield, you should know that the TexSTAR pool consist of allocations of specific diversified securities as detailed in the respective Information Statements. The T-Bill Yield is taken from Bloomberg Finance L.P. and represents the daily closing yield on the then current 90-day T-Bill.
