This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.
- (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

Economic Commentary

Geopolitical headline risks were a major theme in May. Trade tensions between Washington and Beijing persisted, as the U.S. and China appeared to be making progress towards a compromise but struggled to reach an agreement. Tariffs on \$50 billion of goods and other sanctions on China were announced by month end. The steel/aluminum tariff exemptions granted in March to the European Union, Canada and Mexico were allowed to expire and prompted retaliation. The U.S. also withdrew from the Iranian nuclear deal, which could stir up further instability in the Middle East. Oil prices rose to a four year high due to fears that the U.S. pulling out of the Iranian nuclear deal could further exacerbate supply, but ended the month lower, on the back of comments from OPEC-Russia officials suggesting an easing up of the production limits in response to the potential supply shock.

Government spending is expected to contribute positively to growth in 2018 as the budget deficit is forecasted to rise along with Treasury issuance. The combination of tax reform and the spending bill will create a significant boost to growth both this year and 2019 which could be upwards of 0.5%. On the monetary policy front, minutes from the Federal Reserve (Fed) meeting were construed as dovish as the language on inflation suggested that committee members were comfortable with inflation overshooting the 2% target temporarily. Nonetheless, a rate hike at the June Federal Open Market Committee (FOMC) meeting is widely expected. We expect the Fed under Jerome Powell's leadership to continue to keep the pace of rate hikes gradual. The median of the committee continues to forecast 3 rate hikes this year. Our base case is the Fed will ultimately raise rate three to four times in 2018 given our view that the U.S. unemployment rate will trend further below estimates of NAIRU, inflation will continue to rise and global growth will remain supported. The Fed should be able to continue raising rates in 2019 as the fiscal stimulus from the tax and spending bills should have maximum impact in H2 2018 and H1 2019.
