## GENERAL MEETING OF THE BOARD OF DIRECTORS OF THE CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY

### **RESOLUTION NO. 20-0XX**

### ACCEPTING THE FINANCIAL STATEMENTS FOR JULY 2021

WHEREAS, the Central Texas Regional Mobility Authority (Mobility Authority) is empowered to procure such goods and services as it deems necessary to assist with its operations and to study and develop potential transportation projects, and is responsible to insure accurate financial records are maintained using sound and acceptable financial practices; and

WHEREAS, close scrutiny of the Mobility Authority's expenditures for goods and services, including those related to project development, as well as close scrutiny of the Mobility Authority's financial condition and records is the responsibility of the Board and its designees through procedures the Board may implement from time to time; and

WHEREAS, the Board has adopted policies and procedures intended to provide strong fiscal oversight and which authorize the Executive Director, working with the Mobility Authority's Chief Financial Officer, to review invoices, approve disbursements, and prepare and maintain accurate financial records and reports;

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of July 2021 and has caused financial statements to be prepared and attached to this resolution as Exhibit A; and

NOW THEREFORE, BE IT RESOLVED, that the Board of Directors accepts the financial statements for July 2021 attached hereto as Exhibit A.

Adopted by the Board of Directors of the Central Texas Regional Mobility Authority on the 25<sup>th</sup> day of August 2021.

Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate. (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments  $held in the \, portfolio \, to \, calculate \, the \, weighted \, average \, maturity \, for \, the \, pool.$ 

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waved in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

### ECONOMIC COMMENTARY

#### **Market review**

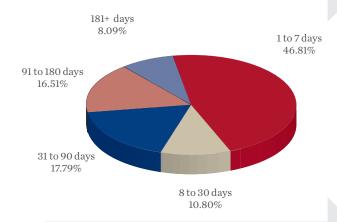

The U.S. economic recovery continued in July, which saw a spectacular corporate earnings season and equity markets reaching new all-time highs, despite the more contagious Delta variant raising concerns that the path to recovery may be more challenging than previously expected. Within fixed income markets, longer term Treasury yields sharply declined as worries over global growth replaced fears of high inflation.

U.S. 2Q21 real GDP, although solid, fell short of the consensus 8.5% estimate, recording a 6.5% quarter over quarter (q/q) seasonally adjusted annual rate. Weaker inventories, due to supply shortages, weighed heavily on growth, despite real consumer spending coming in very strong at 11.8%. Manufacturing purchasing managers' indices (PMIs) continued to show robust growth, with the Markit flash PMI reaching a record high of 63.1 for July. On the other hand, the flash services PMI fell 4.8 points to 59.8, the lowest in five months, as services growth slowed as many firms face labor and materials shortages.

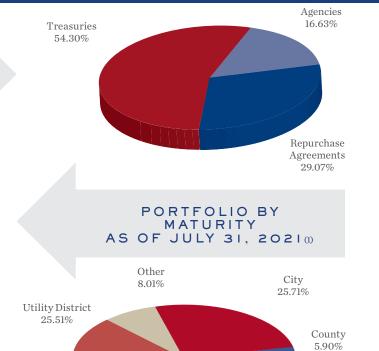

While growth momentum may have peaked in the first quarter, strong data prints and easy monetary policy continued to provide a tailwind for economic growth. As such, inflation has now well surpassed the FOMC's 2% target, as the headline PCE price index rose +0.5% month over month 20 (m/m) and +4.0% year over year (y/y) in June. (continued page 4)

#### ECONOMIC COMMENTARY (cont.)

The core PCE deflator also accelerated to +0.5% m/m and +3.5% y/y, falling short of market expectations. The June CPI report showed consumer prices rising at their fastest pace in more than a decade, as a rapidly reopening economy ran into global supply shortages. Headline CPI for June exceeded expectations, rising +0.9% m/m and +5.4% y/y, while consumer prices excluding food and energy rose +0.9% m/m and +4.5% y/y.

At its July meeting, the Federal Open Market Committee (FOMC) voted to maintain the current federal funds target rate in a range of 0.00%–0.25% and maintain the pace of asset purchases. The statement language was largely balanced in reflecting the committee's outlook, although signaling tapering could begin later this year. The Fed did note that the economy "has made progress" toward its goals, although it was not yet willing to call that progress "substantial". Nevertheless, it is clear the committee recognizes the need to reduce accommodation in the quarters ahead. In line with this, we believe the Fed will announce a timetable for tapering at its September meeting, and begin to taper the pace of its purchases in December.

Chair Powell remained optimistic on the prospects for the labor market and the potential for job growth to pick-up further in the summer and fall. On inflation, he reiterated his belief that transitory factors were responsible for most of the uptick in inflation. That being said, he noted that the unprecedented nature of the reopening post-pandemic may result in inflation being higher and more persistent than they expect. Chair Powell described "transitory" as a price increase that does not leave a "permanent mark on the inflation process".

Additionally, the Fed maintained the interest rate paid on excess reserves (IOER) and the overnight reverse repurchases agreement program (RRP) rate at 0.15% and 0.05%, respectively, in order to support smooth functioning in short term funding markets. The Fed's RRP Facility reached a new usage high of \$1.04 trillion at July month-end. The large participation is an indication of low Treasury bill issuance and is reflective of the large amount of liquidity in the system in addition to the supply/demand gap. Treasury bill issuance is not expected to increase in the near term given the expiration of the debt ceiling limit at the end of July.

With this backdrop, Treasury bill yields were relatively unchanged. The three-month Treasury bill yield ended the month at 0.04%, and the 12-month Treasury bill yield ended at 0.06%.

#### Outlook

Despite the volatility in markets concerning the Delta variant, we believe the consumer is on incredibly strong footing. With consumption making up approximately 68% of U.S. GDP, we see reasons to continue to be optimistic on growth and skeptical that markets should be worried.

Overall, we expect the Fed to keep policy highly accommodative for the foreseeable future. With unemployment elevated and labor force participation depressed versus pre-COVID levels, an accommodative policy stance is still warranted, even as vaccine distribution has been strong and growth remains robust. We anticipate that the Fed will continue to keep their word by maintaining an easy policy stance despite higher inflation as long as it continues to be associated with transitory factors and inflation expectations remains anchored.

We believe the Fed will begin to taper asset purchases in early 2022 and start hiking rates in H2 2023. The inflation developments over the past quarter across realized indices (CPI, PCE) as well as market and survey based inflation expectation measures have reduced the hurdle rate for the Fed to achieve substantial progress. The traditional disinflationary cycle that occurs after a recession has been short-circuited by the fiscal and monetary policy response. Supported by supply chain bottlenecks, inflation and wages have returned to and are set to maintain their pre-COVID underlying trends.
