(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

### Economic Commentary

A number of U.S. releases – including the ISM manufacturing survey, regional business indicators, initial unemployment claims and nonfarm payroll employment – have picked up in recent months. Even some indicators of housing market activity have firmed. Nevertheless, slow nominal income growth, a decline in the household savings rate, still-falling home prices and a high unemployment rate, remain impediments to a more vigorous and sustained recovery, which led the Federal Reserve to surprise the market with a pledge to keep policy rates low beyond mid-2013 until late 2014. Despite the apparent cyclical upswing, long U.S. Treasury yields have declined further given the Fed's news and investors' demand for highly rated government bonds. Due to high unemployment rates, contained inflation, subpar growth and downside risks (particularly from Europe), global monetary policy should remain easy, keeping bond yields low across the major markets. Despite expectations of sub-trend growth, the fear of a recession will keep risk premiums high. Furthermore, inflation – while not today's problem – should continue to be monitored for the longer term, especially given the direction of global policy and upside risks to energy prices from the ongoing unrest in the Persian Gulf and Middle East more broadly.

There are several headwinds to U.S. economic growth during the first quarter of 2012. Weaker momentum in consumption will likely weigh on growth, with recently rising retail gas prices likely to detract from disposable income. The fiscal situation also remains highly uncertain. The current temporary extensions of payroll tax cuts and unemployment claims are expected to be extended yet again. However, given earlier brinksmanship, it seems likely that the extension will be debated up until its slated expiration date of February 29th. If there is no resolution, it is possible that confidence measures will be negatively impacted as consumers begin to doubt the extensions of both programs and reel in spending. Nevertheless, the Fed appears to be aware of the headwinds to growth, given the output of its January FOMC meeting. The committee stated that it will take a "balanced approach" in achieving its dual mandate, weighing current levels of unemployment and inflation versus the FOMC's long term central tendency forecasts. Thus, should economic data and labor market slack not materially improve in the coming months, it is believed the FOMC will increase the pace of its accommodative policy by embarking on another round of asset purchases.
